

C-90

POULTRY FEED
SUPPLEMENT

Best For:

- C-90 reduces stress especially heat stress.
- C-90 enhances the immune system.
- C-90 improves the resistance against disease.
- C-90 help body oxidation process.

C-90

POULTRY FEED SUPPLEMENT

COMPOSITION:

Each 1 kg contains:

Ascorbic acid.....900g

Excipient q.s.f.....1000g

Vitamin C also known as ascorbic acid, is an essential nutrient for poultry and livestock. It plays a critical role in supporting their immune health. The vitamin is required for the synthesis of collagen, a protein that provides structural support to tissues, including the skin, bone, and cartilage.

Vitamin C alleviates the side effects of stress, thus increases heat tolerance in birds, and improves chickens response to cell functional immunity.

Vitamin C (ascorbic acid) is required to form blood vessels , cartilage, muscle, collagen in bones.

Vitamin C is also vital for body's healing process.

Vitamin C in the poultry's diet improves resistance to diseases, regulates stress, and helps in the body's oxidation process.

Vitamin C enhances the laying rate, egg hatch performance, and higher poultry productivity.

Vitamin C is essential to fight the effects of heat stress in poultry. Vitamin C (ascorbic acid) can be synthesised by the poultry in their kidneys, but when exposed to excessive heat, is insufficient. Vitamin C is required for the absorption of Vitamin D3 into its metabolic form.

INDICATIONS:

C-90 reduces stress especially heat stress.

C-90 enhances the immune system.

C-90 improves the resistance against disease.

C-90 helps body oxidation process.

C-90 improves poultry productivity including FCR and egg production.

C-90 improves repair of tissue in all parts of body.

C-90 acts as detoxifying agent.

C-90 improves egg production as well as sperm quality in male breeder.

ADMINISTRATION AND DOSAGE:

Poultry:

1 g per 8 liters of drinking water daily for 5-7 days.

Feed premix:

1 kg per 3-4 tons of feed during stress conditions or hot climates.

PACKING: 1 Liter
