IMMUNOSIGN POULTRY FEED ADDITIVES

Immune Booster For Poultry

COMPOSITION:

Each 1 liter contains:

Beta Glucans 1.3-1.6 (min).....	50 000 mg	Immunoglobulin (IgY).....	5 g
Mannan oligosaccharides (min).....	45 000 mg	Echinacea extract.....	5%
Fructose oligosaccharides (min).....	100 000 mg	Nucleotides.....	400 000 mg
Peppermint oil.....	5%	Omega 3 fatty acids.....	30 000 mg
Eucalyptus oil.....	5%	Yeast extract with Vitamin A, D3, E, B1, B2, B5, B6, PP	
Garlic extract.....	5%	and Amino Acid: Lysin, methionine, L-Arginine, L-Carnitine,	
Cinnamon extract.....	1%	Leucine, Ethanol & Aminophosphoric acid up to.....	1000 ml

IMMUNOSIGN

- Beta-glucans can stimulate the immune system of poultry, including the adaptive immune system
- Mannan oligosaccharides (MOS) stimulates the immune system, helping birds fight off disease.
- Fructo oligosaccharides (FOS) are a common prebiotic used in poultry diets that can improve the health and performance of poultry
- Peppermint oil can significantly improve feed conversion ratio.
- Eucalyptus oil can stimulate the immune response in chickens. It contains active molecules like menthol and 1.8-cineol that can help stimulate the immune system
- Garlic can stimulate the immune system and prevent bacterial and parasitic infections.
- Cinnamon extract is a natural, non-toxic, and residue-free alternative to antibiotic growth promoters (AGPS)
- Immunoglobulin (IgY) provides the developing embryo with passive immunity to common avian pathogens until the chick's immune system matures.
- Echinacea extract can improve the immune system health of broilers. It can also enhance intestinal immunity and increase production performance.
- Nucleotides are essential nutrients for poultry that can improve their growth, gut health, and immunity, especially during stressful conditions
- Immunity: Omega-3s can help improve the immune response of poultry
- Yeast extract can improve immune responses in chickens. Yeast cell wall extracts can improve gut conditions and reduce gut inflammation.
- Amino acids like arginine and threonine help with immunological functions and antibody production

INDICATIONS:

- Immunosign is supportive therapy for enhancing the immune system and resistance to bacteria, parasites, viruses especially in ND, IB H9 & Avian Influenza.
- Immunosign contains herbs in the product composition and vitamins, amino acids in yeast extract help to protect and support kidney and liver function.
- Immunosign supply yeast extract, MOS, FOS. Beta-glucan to prevent appertite, metabolisam, and faster growth rate.
- Immunosign support the development of probiotics and prevent harmful micro - organisms.
- Immunosign maximize the efficiency of vaccines.
